RIGID

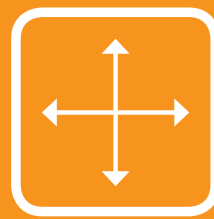

MEISTER

Design flooring Edition M5 RIGID

The design flooring Edition M5 RIGID is the new rigid-core flooring in the MEISTER range. The water-resistant floor is particularly dimensionally stable thanks to its special rigid-polymer base board, while an additional damping layer also makes it comfortably elastic. It can be installed floating over slightly uneven subfloors and existing floor coverings such as tiles and, with its low installation height of 4.5 mm (5.5 mm with integrated sound-absorbing cushion), is perfectly suited to renovations. Despite their high level of stability, the planks still have a low surface weight – this makes them particularly easy to transport and work with.

Can be laid through doors without any transition

15 x 10 m (L x W) can be laid without an expansion joint

Suitable for winter gardens

Non-slip level R 10

Antistatic ≤ 2 kV

Suitable for hot water underfloor heating

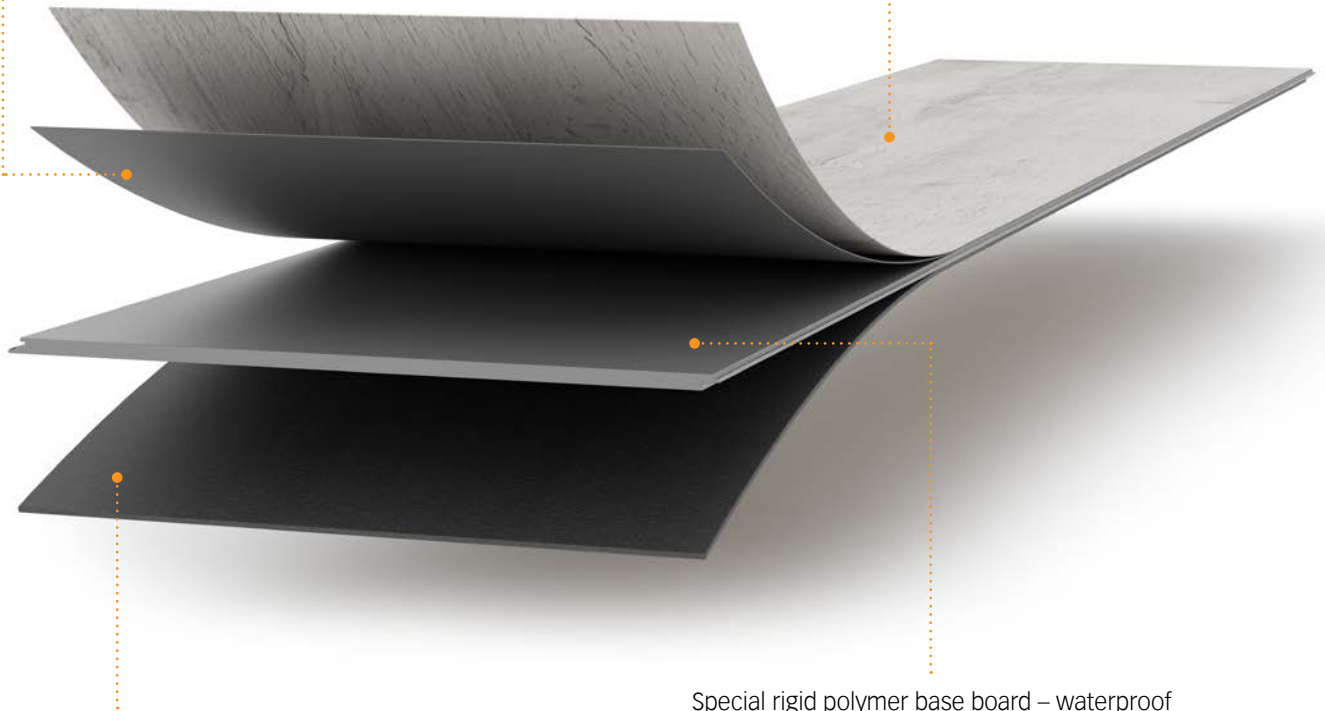

Eight attractive decors

EDITION M5 RIGID

Elastic
damping layer

Multi-layer vinyl surface with PUR coating

Integrated sound-absorbing
cushion on Edition M5 S

Special rigid polymer base board – waterproof

Design flooring Edition M5 (S) RIGID

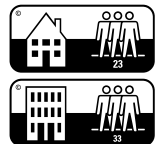

- | Wear class 23|33
 - | All-round micro-bevel
 - | Waterproof | suitable for humid rooms
 - | Special rigid polymer base board – waterproof
 - | Multi-layer vinyl surface with PUR coating
 - | With sound-absorbing cushion on request
 - | Click system: Multiclic
- | MEISTER warranty*
25 years in living areas
5 years in commercial areas
 - | Thickness: 4.5 mm (5.5 mm
with sound-absorbing cushion)
 - | Effective measurement:
1290 × 228 mm

* Warranty according to the MeisterWerke warranty conditions.
